
Digitalizing Industries & Infrastructure

Automation. Futurism. Sustainability.

CONSYST is a Multinational Industry 4.0 Automation System Integration Company Providing Engineering and Technology Solutions for Customers Across the Globe.

State-of-the-art infrastructure with world class facilities

CONSYST is backed with robust infrastructure consisting of an ideal blend for man and machine with world class facilities and amenities. Our Center of Excellence boasts of an infrastructure spread over an area of 13,000 Sq. feet, with dedicated shop floor facility of 4,000 Sq. feet for manufacturing.

Apart from this, we have several other facilities including a Conference / Training room, warehousing system and Customer

The state-of-the-art manufacturing facility is equipped with all the necessary equipment with production capacity of manufacturing 18 numbers of control panels at a time with measurement 1200 x 2200 x 800 (W x H x D).

Dedicated Factory Acceptance Test (FAT) bay is well equipped with all the testing setup for conducting FAT and Integrated FAT (iFAT) by customers.

Why Us?

A team of experienced professionals solving problems for organizations around the globe using cutting-edge technology.

OT & IT Expertise

Global Industrial Exposure

More than a Decade of Service to our Customers

State-of-the-Art Infrastructure

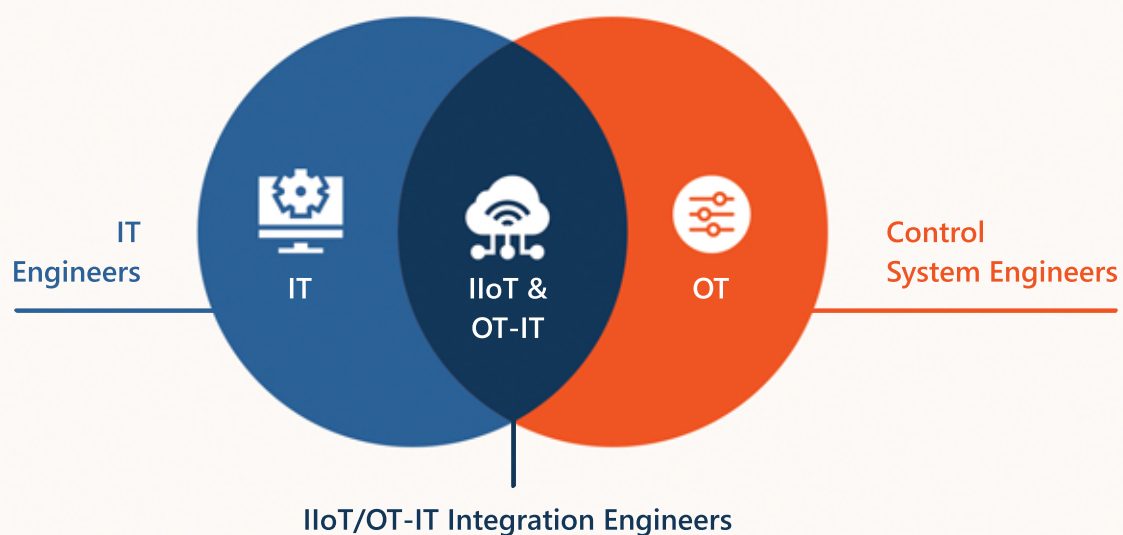

Multi-Talented and Certified Resources

Vendor Agnostic Approach

Diverse Talent Pool

Industry 4.0 Technologies we are experts at

IIoT, Edge & Cloud Computing

IIoT is a paradigm transformation in the industrial arena promising better management of time & resources, cost efficiency and most importantly a thriving customer centric business model

OT Cybersecurity

OT cybersecurity helps organizations safeguard their operational technology systems against cyber attacks, reducing the risk of costly disruptions, physical damage, and reputational harm, and enabling safer and more reliable operations.

OT-IT Integration

High consumer expectations push companies to integrate IT and OT for end-to-end automation and conversion of real-time data into actionable intelligence.

Mobility Solution

Mobile devices are one of the most adopted and disruptive technologies mankind have ever seen, which have literally made computing power available at our fingertips.

Big Data, AI & Machine Learning

AI and ML technologies are evolving to deliver value in a wide range of industrial businesses through demand forecasting and predictive maintenance.

Control & Automation

Programmable Logic
Controllers (PLC) Panel

VFD and iMCCs

SCADA Systems

RTUs and Substation
Automation Systems

E&I EPC Services
